Reflection on Assignment 3

Visit to UTMDigital and the Attended Virtual Talk

Course: Technology and Information System (SECP1513-07)

Name: Raden Salma Humaira binti Muhammad Mun'im

No. Matric: A23S0264

Lecturer: Ts. Dr. Sarina binti Sulaiman

Reflection

The UTMDigital visit has broadened my perspective about working in the ICT industry. UTMDigital was a very comfortable, conducive place to work at, given that every employee's cubicles were spacious, provided a pantry and also a brilliant relaxation area for breaktime too. Most of the equipment is advanced and innovative at first sight, we were amazed and able to try it out too such as the Huawei Ideahub, an interactive display for video conference and presentation. To top it off, the staff were friendly to all students and ensured our visit was compelling at maximum. This impacted me greatly and shaped my view that work life should be enjoyable thanks to the attentive colleagues and to the propitious facilities.

What I have learnt from this evening visit is that I was able to understand better about this course and see the applications in the real world. To illustrate it better, in Chapter Database and Data Analytics we have learnt about company shared databases which are usually stored on a central database server and managed by a database administrator. During our visit to the data centre, we were able to see the real deal where the computers, the ones that provide physical and virtual servers are in a tightly secured room with floored air-conditioning. Thus, this has made clear the big picture in my head of how a data centre works and its functionality for the users in layman's terms since I will not understand the technical terms if I were to be explained in a jiff. To add, I think the preparations made by the staffs to welcome us are admirable to boot, because there were no impede in our visit in terms of timing and the physical obstacles so I must also follow their examples to make everything doable in time before the real event or program takes place whenever I was assigned with a big task.

Improvement and Sneak Peek

I totally enjoyed it to the point I do not know where to point the flaws. So, here are the pictures:
