

Reflection on Assignment 1

Visit to NALI 2023

Course: Technology and Information System (SECP1513-07)

Name: Raden Salma Humaira binti Muhammad Mun'im

No. Matric: A23S0264

Lecturer: Ts. Dr. Sarina binti Sulaiman

Reflection

From this assignment, I have learnt about the exquisite technology ideas being refined at best so that it becomes a tangible project, able to benefit others in daily lives. It also taught me how to communicate effectively with speakers from the booths and being capable enough to carry interviews smoothly to reach our objectives. On the other hand, some of the ideas I saw liable to be implemented on campus were not nominated in the awards ceremony, which dejected me deeply. Sic vita, if you fail once it does not mean you fail everything in life. Hence, this incident has given me greater purpose to never stop learning computer science related materials even if it feels obstructive and always find the best way that fits my capabilities and potential in order to reach people out there who need help.

Improvement

This visit could have been improved by bringing speakers from around the globe on the day students were not busy with lecture classes. The innovation trends and challenges brought upon by these speakers can enhance more diversity and integrate the good aspects to our own technology cultures.

Sneak Peek
