Reflection on Assignment 4

System Development @ Credence (TM Subsidiary)

Course: Technology and Information System (SECP1513-07)

Name: Raden Salma Humaira binti Muhammad Mun'im

No. Matric: A23S0264

Lecturer: Ts. Dr. Sarina binti Sulaiman

Reflection

What I have learnt from this talk is that system development is a vital part in the IT industry that makes the industry as dynamic as it is now. Without the proper methodology to be applied during system development, the project's objectives would not be achieved and clients' needs are not met, which could lead to downfalls of team's morales and company's reputation. I also acknowledged that to become as successful as Ms. Qistina (the speaker), we must be able to conform with the academic struggles we had and overcome it with any legal means possible. Interestingly though, all of the programming languages and softwares mentioned were unfamiliar to me except Python and MySQL, which means my effort to become a good system developer seems scarce. With the price of blood, tears and willingness, they will definitely make up the devoid pools of skills I have yet to polish within time.
